*Novoceram, French ceramic producer since 1863, unveils a collection of white body tiles for interior walls that welcomes nature and brings a flowery touch.*

## PRESS RELEASE

**Bloom** is a collection of white body tiles that **Novoceram**, French ceramic producer since 1863, has designed for interior walls.

Ideal to create delicate atmospheres, **Bloom** enables nature to express all its beauty through its **botanical prints from the 18<sup>th</sup> century**. These constituted the source of inspiration behind the floral spirit, which profoundly influenced the great **luxury brands** in the 1960s and assumes nowadays a timeless character.

The **flowery and plant patterns** of this ceramic wallpaper joyfully stand out against the background, available in three pastel colours – blue, pink and white –, which fulfil every need of sweetness. The poesy that emanates from **Bloom** makes it a true decorative element that brings in interior spaces the elegant style of this unforgettable fashion and design era.

**Bloom** is an 80x80-cm composition made of two 40x80-cm tiles.

To find out more about **Bloom** and (re)discover all the **Novoceram** collections, visit our **[official website](#)** or join our **[Facebook page](#)**.

## OUR CERTIFICATIONS:

- **ISO EN 9001**: standard that sets out the requirements related to the **company's quality management system** that is part of a continual improvement at all levels which include: customer relations, willingness to communicate, internal organisation, relations with suppliers and production processes.
- **ISO EN 14001**: standard that sets out the requirements related to the **environmental management system** based on **environmental commitment**, on strict standards and on increasingly ambitious goals that the company has implemented to control and reduce its impact on the environment and to continuously improve its performance.
- **ISO EN 50001**: standard that sets out the requirements related to **energy management systems**. This certification, driven by the wish to better control and optimise energy consumption, is the logical continuation of a continuous improvement approach and an environmental commitment.

## PRODUCT CERTIFICATIONS:

- **Indoor emissions**: index measuring emissions of volatile substances posing a risk of inhalation toxicity. All our tiles are assigned A+, - the best note in the classification. Furthermore, as **they do not contain Volatile Organic Compounds (VOCs)**, they even outperform all the requirements for the A+ classification.
- Novoceram products are involved in obtaining various ecological certifications for the construction industry such as the American certification, **LEED** (Leadership in Energy and Environmental Design). Novoceram has also established the **PEF** (Performance Environmental Footprint) and **EPD** (Environmental Product Declaration) of its products, which indicate the potential environmental impact of a product throughout its entire life cycle.
