

TABLON

Wood Effect tiles for exterior floors

Novoceram, French ceramics manufacturer since 1863, presents a wood effect collection in colored in body porcelain stoneware for exterior floors which display with charm the trace of time.

PRESS RELEASE

Tablon is a collection of tiles in colored in body porcelain stoneware by **Novoceram**, French ceramics manufacturer since 1863, designed for exterior floors.

Brut of nature, **Tablon** is inspired by a wood that displays without complex and with charm the trace of time. **Tablon**'s collection reproduces with fidelity a wood marked by the scratches of the weather and the assaults of the sun... Tasks, cracks, furrows are added to the characteristic veins of the original essence and become the distinctive signs of a new nobility.

Designed for outdoor, Tablon's collection adds to the **Outdoor Plus** range and combines with elegance the natural look of the wood marked by the cicatrise of the time and the technical advantages of the 20mm **colored in body porcelain stoneware**. Available in two sizes 30x120 and 60x60, Tablon wood look tile is available in three color versions: **Tablon Clair**, a warm white and extremely luminous oak-wood, **Tablon Naturel**, a natural oak-wood, whose original color has been tempered by the long exposure to the elements and **Tablon Gris**, originally a fully veered teak completely in a gray color with silver-like reflections.

To find out more about Tablon and (re)discover all the Novoceram collections, please visit our [official website](#) or join our [Facebook page](#).
