

HISPALIS

Stone-look floor and wall tiles for interiors and exteriors

Novoceram, French ceramic manufacturer since 1863, presents a through-body coloured porcelain stoneware collection for indoor and outdoor spaces, inspired by Campaspero limestone.

PRESS RELEASE

Hispalis is a porcelain stoneware collection by **Novoceram**, inspired by Campaspero limestone, a stone quarried from the Castilian plateau in Spain and used for centuries in historic architecture. This inspiration is expressed through a neutral background crossed by fine veins, combined with a homogeneous texture and particularly refined grain.

Novoceram translates these characteristics into **through-body coloured porcelain stoneware**, preserving the understated appearance and subtle variations of this limestone. The surface features a discreet pattern made up of mineral variations that add depth without altering the overall homogeneous appearance.

Hispalis is available in four colours. **Ivoire** reproduces the light and delicate shade of the original stone. **Taupe** offers a more intense interpretation, with a deeper tone. **Sable** brings a warmer shade, while **Cendre** introduces a warm grey with subtle variations. This palette offers a choice of shades to suit each room and the desired atmosphere.

The collection is available in a **9 mm thickness**, in **60×120, 80×80, 60×60 and 30×60 cm** formats, as well as **10×60 cm** and a **5×5 cm mosaic**. Depending on the format, Hispalis is available in an **R10 A+B** or **R11 A+B+C** finish.

For outdoor applications, the **Outdoor+** range complements the collection with a **60×60 cm format in 20 mm thickness**, featuring a slip-resistant **R11 A+B+C** finish. This version allows for visual continuity between different spaces.

OUR CERTIFICATIONS:

- **ISO EN 9001**: standard that sets out the requirements related to the **company's quality management system** that is part of a continual improvement at all levels which include: customer relations, willingness to communicate, internal organisation, relations with suppliers and production processes.
- **ISO EN 14001**: standard that sets out the requirements related to the **environmental management system** based on **environmental commitment**, on strict standards and on increasingly ambitious goals that the company has implemented to control and reduce its impact on the environment and to continuously improve its performance.
- **ISO EN 50001**: standard that sets out the requirements related to **energy management systems**. This certification, driven by the wish to better control and optimise energy consumption, is the logical continuation of a continuous improvement approach and an environmental commitment.
- **ISO EN 17889-1**: standard that establishes requirements for **energy management systems**. This certification, motivated by the desire to better control and optimise energy consumption, is the logical next step in a process of continuous improvement and environmental commitment.

PRODUCT CERTIFICATIONS:

- **Indoor emissions**: index measuring emissions of volatile substances posing a risk of inhalation toxicity. All our tiles are assigned A+, - the best note in the classification. Furthermore, as **they do not contain Volatile Organic Compounds (VOCs)**, they even outperform all the requirements for the A+ classification.
- Novoceram products are involved in obtaining various ecological certifications for the construction industry such as the American certification, **LEED** (Leadership in Energy and Environmental Design). Novoceram has also established the **PEF** (Performance Environnemental Footprint) and **EPD** (Environnemental Product Declaration) of its products which indicate the potential environmental impact of a product throughout its entire life cycle.
